

CAREER SUMMARY

Innovative Junior Software Development Engineer in Test (Jr. SDET) with 2+ years of experience architecting end-to-end test frameworks using Python, Java, and Selenium. Proven strategic thinker with deep domain expertise in warehouse logistics (Blue Yonder, Koerber) and complex EDI transactions. Recognized for technical excellence—winning a Chennai-level hackathon and a corporate business ideathon—by developing custom full-stack, AI-driven utilities (Flask, JS, Kubernetes, LLMs) that integrate with APIs to eliminate manual overhead and streamline day-to-day testing workflows.

EXPERTISE

WMS (Koerber, Blue Yonder) | EDI Transactions (ANSI X12) | Supply Chain Logistics | Automation | Custom Tool Development | AI/LLM Integration | Test Framework Architecture | API-Driven Jira Workflows | Cross-Functional Problem Solving

TECHNICAL SKILLS

Programming & Scripting: Python, Java, SQL, JavaScript, HTML5, CSS3, Tera Term Language (TTL)

Testing Methodologies: Functional, System Integration (SIT), End-to-End (E2E), Regression, API Testing, Data Validation

Automation & Tools: Selenium WebDriver (Python & Java), Pytest, CI/CD Pipelines, Postman, Git, Kubernetes, Test Framework Architecture, Page Object Model (POM)

Frameworks & Web: Flask, REST APIs, Jira API Integration

AI & Specialized Tech: LLM Integration, AI-Driven Utilities, Custom Tool Development

Domain & Protocols: EDI (ANSI X12: 940, 943, 944, 945, 846, 856, 947), WMS (Blue Yonder, Koerber), RF Terminal Automation

PROFESSIONAL EXPERIENCE

QA AUTOMATION ENGINEER – Jr. SDET | Cognizant Technology Solutions | Chennai, TN

Aug 2024 – Present

ACCOUNT: AMERICOLD COLD CHAIN SOLUTIONS

- › **AI & Custom Tooling:** Developed "Cold Ops AI (LogiGenie AI)" integrating Jira APIs and LLMs to automate test plan generation, streamline multi-screen WMS configurations, and provide AI-driven debugging with strict data security.
- › **WMS & EDI Validation:** Led SIT and Functional Testing for large-scale migrations, validating critical ANSI X12 EDI transactions (940, 943, 944, 945, 846, 856, 947) across Blue Yonder and Koerber environments.
- › **Automation Architecture:** Built a web automation framework for Blue Yonder, enhanced Koerber desktop scripts, and automated sequential RF terminal workflows using custom TTL macros.
- › **Troubleshooting & Go-Live:** Resolved complex EDI-to-WMS data mapping discrepancies and spearheaded zero-defect, on-time production migrations for high-priority clients.
- › **Award-Winning Innovation:** Won a regional hackathon and corporate ideathon by designing full-stack utilities (Python, Kubernetes, JS) that eliminated daily workflow bottlenecks for cross-functional teams.
- › **Internal Platforms:** Co-developed secure enterprise platforms, including a Knowledge Management portal to centralize technical documentation and team onboarding.

ACHIEVEMENTS

- › BUSINESS LEVEL IDEATHON WINNER - Recognized by Delivery and Business Leadership for engineering high-impact, value-add automation tools that were successfully adopted team-wide.
- › CHENNAI LEVEL HACKATHON WINNER – Recognized by Senior Vice President (Cognizant) and GTM (OpenAI) for engineering powerful tool in 3hour duration.
- › BEST PERFORMER IN ACCOUNT (Q3 2025 & Q2 2026) – Awarded by management for consistently delivering high-impact contributions and exceptional technical performance within the account.

CERTIFICATIONS

- › **Anthropic** - Claude Certified Architect – Foundations
- › **Cognizant** – Selenium, Context Engineering, MySQL, AI Augmented Web Automation, Certified Jr. SDET

EDUCATION

BACHELOR'S DEGREE | Electronics and Com. Engineering | St. Joseph's Inst. Of Tech. | Chennai | 87.8%

2019 – 2023
